

Pigeon Mountain School's Inquiry Model

The star represents the inquiry learning model. The idea is for the children to navigate around the stages and visit each point of the star. It allows the freedom to stop at, or bypass any stage. Reflecting, refining and reviewing are revisited often and are at the centre of the whole process.

The Key Competencies surround the star. As the children develop the competencies, successful learners are motivated to use them, recognising when and how to do so and why.
